

Ideation Phase

Define the Problem Statements

Date	28 September 2026
Team ID	SWTID-2026-2056
Project Name	Client Scripts & UI Policies (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an IT Support Agent working on	quickly create and update Incident	the Incident form	Client Scripts and UI Policies are	frustrated, slows down my work, and increases

	Incident tickets	records with the right fields mandatory and relevant options shown	shows all fields at once, some mandatory fields appear too early or stay hidden when needed, and there is no auto-population based on Category or Priority	not properly configured for the Incident form to control visibility, mandatory state, and dynamic values	the chance of incomplete or incorrect tickets
PS-2	a ServiceNow Administrator / Developer responsible for Incident management forms	enforce consistent form behavior, reduce user errors, and guide agents with smart defaults without writing complex code every time	I have to rely on many scattered Client Scripts or manual training, and changes in form logic become hard to maintain and test	there is no clear, well-structured set of UI Policies and Client Scripts tailored for common Incident scenarios (Priority, Category, Assignment Group, etc.)	overwhelmed by maintenance, worried about inconsistent user experience, and less confident in the platform configuration
