

Ideation Phase

Empathize & Discover

Date	28 September 2026
Team ID	SWTID-2026-2056
Project Name	Incident Client Scripts and UI Policies
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map – Incident Client Scripts and UI Policies

<i>What does the THINK & FEEL?</i> • Wants a simple Incident form • Worries about incorrect data • Expects automatic field control	<i>What does the HEAR?</i> • Users ask for clear instructions • Team reports data-entry issues • Support asks to reduce manual work	<i>What does the SEE?</i> • Many Incident fields • Different Impact/Urgency values • Fields needing mandatory/read-only control
<i>What does the SAY & DO?</i> • Creates and updates Incidents • Changes values based on conditions • Needs faster form behaviour	<i>USER</i> • ServiceNow Incident User / Agent	<i>What does the user NEED?</i> • Clear field behaviour • Immediate guidance • Consistent form experience
<i>Pain</i> • Incorrect or missing information • Too much manual checking • Confusing field behaviour	<i>Key Insight</i> • Dynamic form guidance can improve data quality • Client Scripts + UI Policies reduce unnecessary manual work	<i>Gain</i> • Better user experience • Faster incident creation • More consistent and accurate data

User Insight Summary: ServiceNow Incident users need a clear and responsive form. Client Scripts and UI Policies can dynamically control fields, reduce incorrect data entry, and improve the overall Incident management experience.
